Number of gaps in sample: 13
 (note: computations for rho restarted at each gap)
 note: 2012.year omitted because of collinearity
 note: 2013.year omitted because of collinearity
 (note: rho_i could not be computed for panel code 121;
 assumed to be 0.)
 (note: rho_i could not be computed for panel code 160;
 assumed to be 0.)
 (note: estimates of rho outside [-1,1] bounded to be in the range [-1,1])
 (note: at least one disturbance covariance assumed 0, no common time periods
 between panels)

Prais-Winsten regression, correlated panels corrected standard errors (PCSEs)

```

Number of gaps in sample: 13
(note: computations for rho restarted at each gap)
(note: rho_i could not be computed for panel code 121;
assumed to be 0.)

(note: rho_i could not be computed for panel code 160;
 assumed to be 0.)
 (note: estimates of rho outside [-1,1] bounded to be in the range [-1,1])
 (note: at least one disturbance covariance assumed 0, no common time periods
 between panels)

Prais-Winsten regression, correlated panels corrected standard errors (PCSEs)
